

Lab Module 1

❖ **Identify and classify 5 applications you use daily as either system software or application software.**

Ans. Here are five daily-used applications classified as system software or application software:

1. Operating System (e.g., Windows, macOS, Linux)

- Type: System Software
- Explanation: Manages hardware resources and provides a platform for running application software.

2. Web Browser (e.g., Chrome, Firefox, Safari)

- Type: Application Software
- Explanation: Allows users to access and interact with websites and web-based services.

3. Antivirus Software (e.g., Norton, McAfee)

- Type: System Software
- Explanation: Protects the system from malware and other security threats by monitoring and controlling data access.

4. Microsoft Office (e.g., Word, Excel, PowerPoint)

- Type: Application Software
- Explanation: Provides tools for word processing, spreadsheet management, and presentation creation.

5. Media Player (e.g., VLC, Windows Media Player)

- Type: Application Software
- Explanation: Allows users to play audio and video files on their devices.
